Office Action Summary

Application No.

10/668,805

Applicant(s)

VALEN, MAURICE

Examiner

Candice C. Stokes

Art Unit

3732

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 May 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-29 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 29 is/are allowed.
- 6) ☒ Claim(s) 1-28 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1) Claims 1-2 and 4-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kumar (USPN 6,364,662) in view of Blake (USPN 5,139,098). Kumar discloses a multifunctional rotary tool bit 10 for a drilling and cutting system adapted for preparing an osteotomy in a bone, comprising: a) a longitudinal, rotatable shaft end and a distal end; having a proximal (see column 6, lines 24-25) b) a mounting shank 22 disposed at said proximal end of said longitudinal, rotatable shaft for interfacing with a handpiece of an osteotomy cutting and drilling system; c) a cutting and drilling blade 24 having a proximal end and distal end, disposed at said distal end of said longitudinal rotatable shaft, said cutting and drilling blade including a plurality of cutting edges 34,36 and surfaces for cutting and drilling bone and tissue material; and d) an osteotomy locator tip 38 having dual lobes disposed in a common plane, formed at said distal end of said cutting and drilling blade 24, to locate an osseous implant site and prevent wandering and slipping of said tip. This also anticipates claim 15. As to claims 2 and 15, the first portion of said distal end of said cutting and drilling blade immediately after said osteotomy locator tip 38 comprises a tip 36 capable of being redirected permitting the avoidance of vital features in the jawbone by the lateral movement of said redirectable tip 36. Regarding claims 4 and 18, said cutting and drilling blade 24 has multifaceted cutting edges 34 for creating a crestal

Art Unit: 3732

bone height reducer. With regards to claims 5 and 19, said proximal end of said cutting and drilling blade 24 comprises a tapered countersink (tapers from where reference #26 ends to where reference #44 begins as shown in Figure 3). Kumar also discloses the last portion of said proximal end of said cutting and drilling blade immediately after said tapered countersink further comprises a gross osseous crestal bone height reducer 44. This anticipates claims 6 and 20. As to claims 7 and 21, the tool bit 10 further comprises an osteocompressor (inherently the bone is compressed by the tool bit)operatively connected to said gross osseous crestal bone height reducer 44. With respect to claims 8,11,22, and 25, Kumar discloses the cutting and drilling blade 24 is coated with material 20 to reduce the coefficient of friction, improve drilling and cutting performance, improve wear and corrosion resistance, and increase the thermal conductivity of said cutting and drilling blade 24. Specifically Kumar discloses “at least a portion of the tool bit or dental instrument 10 (Fig. 1) is coated with an amorphous hard carbon coating or film 20, as schematically illustrated in Fig. 2. The coating 20 can comprise, for example, a diamond-like carbon (DLC) coating 20” (column 5, lines 9-13). Further Kumar discloses, “one advantage of the coating 20 (Fig. 2) is that it provides a reduced coefficient of friction (enhanced lubriciousness) between the jawbone and the hard carbon coated dental instrument of the present invention, and desirably improves the cutting performances” (column 5, lines 46-51). in accordance with claim 7, wherein said to reduce blade. This also anticipates claims 9,12,23, and 26. Regarding claims 10 and 24, the tool bit 10, further comprising a linking member 26 operatively connecting said gross crestal bone height reducer and said mounting shank. Further, the linking member 26 is also coated with a material 20 to reduce the coefficient of friction, and improve wear and corrosion resistance of said linking member. With respect to

Art Unit: 3732

claims 13 and 27, the tool bit 10, wherein said mounting shank 22 includes a chuck 28 comprising a generally I-shaped flat side 50 and a generally semicircular disk 54 above and adjacent to a generally semicircular groove 56. Finally to claims 14 and 28, Kumar discloses the tool bit 10 in combination with a rotation providing handpiece 110 (as shown in Figure 1) to form a dental drilling and cutting system. Kumar substantially discloses the claimed invention except for the tool bit comprising a single instrument. Blake teaches a single multifunctional tool bit 20. It would have been obvious to combine the tools disclosed by Kumar into a single multifunctional tool as taught by Blake in order to provide a single tool capable of performing all of the functions of multiple tools in order to minimize the time and to increase efficiency.

2) Claims 3 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kumar. Kumar discloses the claimed invention except for the redirectable tip being approximately 2mm in length. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the redirectable tip being any size capable of fitting on the tool bit in order to be used in the jaw of a patient, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Allowable Subject Matter

Claim 29 is allowed.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Candice C. Stokes whose telephone number is (571) 272-4714. The examiner can normally be reached on 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cris Rodriguez can be reached on (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
